

From the Doctor's Desk

On May 6, 2009 the practice hosted a second Thermage

event with a great turnout. I want to thank all those who attended and hope that everyone learned something about this incredible procedure.

In December of 2008 we added Thermage to the practice because it is a long-term solution to the fight against aging. Since the arrival of Thermage here at COF I have been performing the procedure on the face, neck and eyes. Recently there has been a growing number of requests for more information on Body by Thermage and I have decided to perform Thermage on the entire body as a result. The most common areas for Body by Thermage is the stomach, legs and knees, arms and hands and buttocks.

Thermage is a non-invasive, single treatment procedure that tightens existing collagen and stimulates new collagen growth. With Thermage there is little to no downtime, allowing you to return to your normal activities as soon as you leave our office. This virtually painless procedure tightens, smoothes and contours the skin, generating a younger looking appearance.

For more information on Thermage please set up a consultation with me by calling our office.

Would you like \$50?

The greatest compliment our office can receive is a referral of a friend or family member. And during these tough times we know many of you wouldn't mind some extra padding in your pockets. So, starting June 1, 2009 we will implement our new Care-To-Share program, offering \$50 to you for each referral you send who becomes a patient at our practice. You can also choose to receive a 10% discount off your next service from Dr. Lee in lieu

of the monetary thank you. We will have new Care-To-Share cards with all of our information on them for you to give to those you know. You can pick these cards up at our office or print them off of our website in the near future. If you would like to refer someone and do not have a Care-To-Share card just make sure they mention your name when scheduling their appointment. If you have any questions regarding the Care-To-Share program please call or e-mail the office.

Dr. Lee's on Facebook!

To keep our patients up-to-date on our practice Dr. Lee has joined Facebook, the social networking website. You can search Virginia Lee in the Washington, DC network to send her a friend request and to join our group search *Capital Oral & Facial Surgery Center*. Our group page will show specials, events and other office news on a normal basis, so check it out today!

For more information on any of these articles or future story ideas you can contact our Public Relations Executive at (202)296-6600 or prexec.cof@gmail.com
